

We bring innovations in diagnostics.

INNOVATIVE IMMUNOCHEMISTRY SYSTEM

MONOTEST CARTRIDGE SYSTEM

EXCELLENCE IN DIAGNOSTICS

FULLY AUTOMATED MONOTEST IMMUNOANALYZER

NAISSA®

Combine various type of tests to maximize the efficiency and at the same time minimize analytical error.

The NAISSA® Monotest Immunoanalyzer is the answer for laboratories of all sizes who demand a flexible solution in total automation of more than 250 different assays.

The NAISSA® is a fully-automated Monotest Immunoanalyzer which uses a unique monotest reagent cartridge concept, embraced state-of-the-art technology and offers outstanding flexibility.

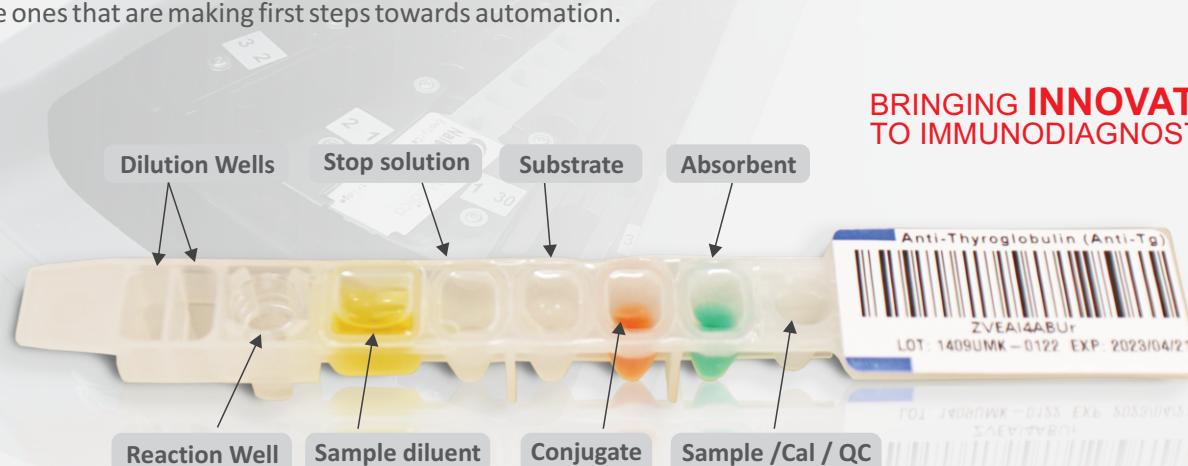

This easy-to-use, beautifully designed benchtop analyzer provides a perfect fit in your laboratory, and is designed to carry out in vitro diagnostic tests such as Viral, bacteria and parasite infections; Cancer and cardio markers; Fertility, steroids, anemia, thyroid kits, etc., just in a few steps.

- All reagents needed to perform tests are incorporated in a single ready-to-use barcoded cartridge.
- Up to 30 different assays can be performed simultaneously in one cycle.

With NeoMedica's 23 years manufacturing experience and our unique expertise, we created the NAISSA® Monotest Immunoanalyzer, developed more than 250 different assays and created an automated system with superior flexibility, reliability and ease of use.

Its versatility comes from the fact that it is a perfect instrument for the most demanding laboratories, as well as for those ones that are making first steps towards automation.

BRINGING INNOVATION
TO IMMUNODIAGNOSTICS

| NAISSA® Technical Features & Benefits

- Test method is EIA as gold standard, well proved.
- 30 positions in temperature peltier controlled (25-37°C) rotor ensure perfect conditions for your 30 different assays in one run.
- Perfect mixing is ensured by 2 vibration motors, IVD Innovative
- Conjugate has own dedicated probe to minimize risk of cross contamination, together with dedicated piercing device for easy and risk free handling reagents.
- NAISSA® reduces carry over with 2 independent set of probes and piercing devices coated with latest technology nanoceramic.
- Reagent level has continually monitored by intelligent software, measured by precise weight sensor, which is more reliable than liquid level sensor monitoring
- Optical system is advanced LED fiber optic - maintenance free. No need for lamp change and difficult adjustments by specialized service engineers.
- PC with touch screen for easy and fast access
- Capacitive level sensor probes for accurate reagent handling
- Ceramic pump with high precision step motor (1 step = 0.01187 µL) is maintenance free.

| NAISSA® PRODUCTIVITY

- Less human effort
- No need for highly educated lab stuff
- Wide range of tests
- New tests constantly developed
- Flexible job list
- Rare and routine kits available on one platform

| NAISSA® Reagents Features & Benefits

- Ready to use barcoded reagent cartridge include all reagents necessary for a single test
- More than 250 assay parameters
- Calibrators and control are included in the kit
- Small kit packing size reducing expiration risk
- P2P +4PL calculation for quantitative results
- No need for making of the calibration curve
- Fresh reagents till expiry date
- Pre-calibrated tests
- No consumables
- No reagent waste
- No dead volumes

An Innovation doesn't need breakthrough technology ...

...recombinig existing simple technologies in a smart way

NAISSA®

An Innovative diagnostic tool of the highest medical value conceived as a business strategic asset

| NAISSA® EFFICIENCY

- Save time and avoid clerical mistakes in pre-analytic phase: NO REAGENT PREPARATION!
- SIMPLIFY OPERATION. Just add sample and click RUN.
- Barcoded labels prevent handling mistakes.
- No reagents collection and storage in post-analytic phase
- New methods come to NAISSA® automatically thru internet, or with just one click on QR code.

FULLY AUTOMATED MONOTEST IMMUNOANALYZER

NAISSA®

TECHNICAL CHARACTERISTICS

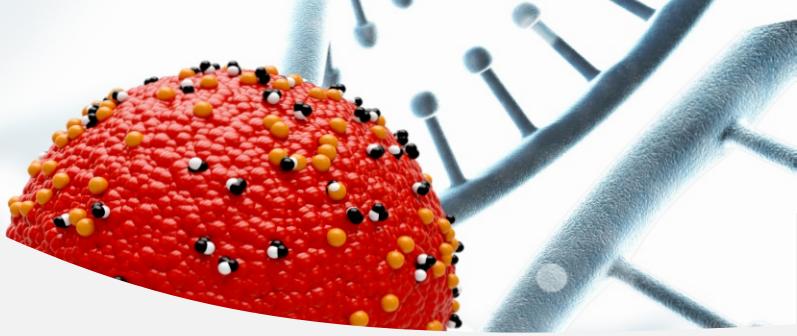

INDEX	PERFORMANCE
Sample positions	30
Sample volume	Minimum 20µL (check instruction for use of each)
Reaction temperature	25±0.5°C or 37°C±0.5°C
Assay Method	EIA
Assay Speed	(60~120) min /30tests
Calibration	Calibrator included in all reagent kits
Quality Control	Internal QC material included in all reagent kits
Test Combination	Different tests with the same reaction temperature
Photometer Light Source	LED
Filters	450nm/630nm
OD Resolution	0.001ABS
Range of OD	0.000~3.000ABS
Accuracy of Filters	≤±3nm
Half width of Filters	≤12nm
Linearity of OD	0.000~3.0000A, r≥0.98
Repeatability of OD	CV≤5%
Accuracy & Fluctuation of Temperature	When operating at 25°C, offset ≤±0,5°C, Fluctuation ≤±0.4°C
Carry-over	≤1%
Accuracy and Precision of Priming	Offset ≤±5%, CV≤2%
Noise	<80dB
Dimension / Weight	680mmx600mmx500mm / 48kg
Voltage	AC 100-240V
Frequency	50/60Hz
Maximum power	350VA

- Clot detection has the advantage of using a special sample position on the cartridge, not the primary tube.
- Naissa has a solution for Anticrash probe as using a state of the art material in the manufacturing process.
- LIS and HIS protocols available.
- Internal memory with more than 100.000 test results, QC, Calibration (depend on HDD capacity).
- Intelligent self diagnostic

NAISSA® INNOVATIVE DIAGNOSTIC TOOL

NAISSA® Reagent Cartridge

The NAISSA® Reagent Cartridge only can be used with automated analyzer NAISSA® by NeoMedica.

Each cartridge is designed for a single determination of one patient sample.

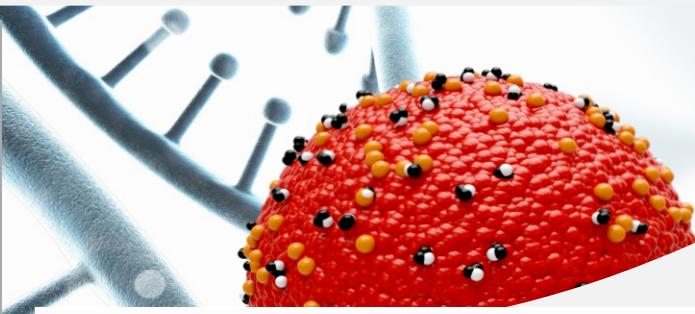

The NAISSA® Reagent Cartridge holds a complete set of reagent enough for one patient sample.

Each test box consists of 24 cartridges including calibrators and controls.

All tests are CE marked.
