**NIMS**<sup>®</sup>

The Health Care Software

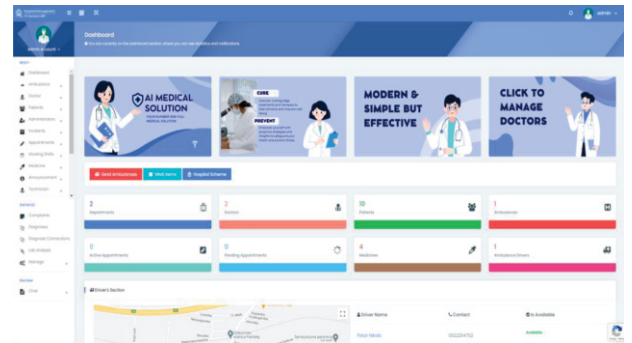

Welcome to the future of patient care!

## State of the art Hospital Information System. Powered by Next Generation Technology.

Running and managing a hospital can be quite challenging at times and no one can do it on their own. That's why we designed NIMS® a hospital management system of tomorrow, equipped with the technology to tackle all challenges of the healthcare system and much more.

### Custom Designed, Technologically Advanced Healthcare & Medicine Practice Management Software.

With NIMS® by your side, managing and running your healthcare institution has never been easier. NIMS® comes equipped with all the functionalities you will ever need and much more, all under the one roof.

### We currently offer the following features

NIMS® is a trusted groundbreaking healthcare software solution for a broad range of specialties. It revolutionizes the patient healing process by providing complete control and transparency at every stage of treatment.

#### Real-time monitoring

Upon admission, **every detail about a patient's condition, diagnosis, and therapy is securely stored in our IVS DS Base**, ensuring easy access and management.

Our comprehensive system manages, monitors, analyzes, and corrects the entire healing process. This includes real-time monitoring of patients' vital signs, therapy, and diet, while also offering instant error corrections and precise system adjustments.

#### Devoted attention to every patient

Our software NIMS® guarantees devoted attention to every patient, allowing their loved ones to actively participate in their care.

With approved access, family members can remotely monitor their loved one's treatment process, access vital signs, blood tests, course of therapy, recommended diet, doctor's visits, and medical examination results, all through our user-friendly Medical app.

#### Streamline the whole healing process

Remote consultations with the patient's doctor can also be scheduled, ensuring continuous communication and collaboration for the best possible outcome. Our software streamlines the whole process, from care and monitoring to diagnosis and therapy adjustments, offering the ultimate patient experience.

## Experience the transformative power of our all-in-one software solution that brings unparalleled safety, efficiency, and accuracy to healthcare management.

### Patient Healing Process

**Monitoring, Controlling and Correcting.**

At all times, system monitors and reports in real time all parameters, therapy and diet of patient.

**Devoted Attention to the Patient.**

Every single step in treatment process is carefully monitored. With approved access, treatment process may be monitored by patient's family member.

**All Actions are Recorded.**

Changes in therapy, healing process, doctor's visits and reports are recorded and saved. Real Time error corrections.

**Admission of patients.**

All data on condition, diagnosis and therapy of a patient are digitally stored in IVS DS Base.

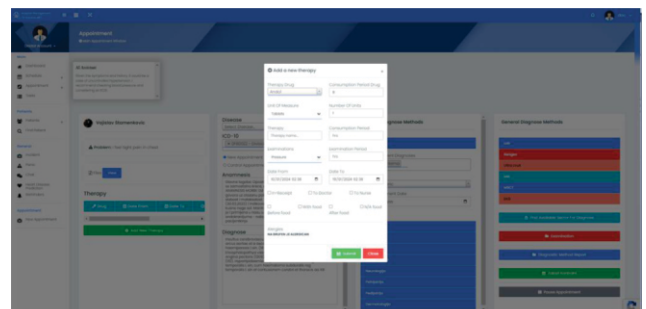

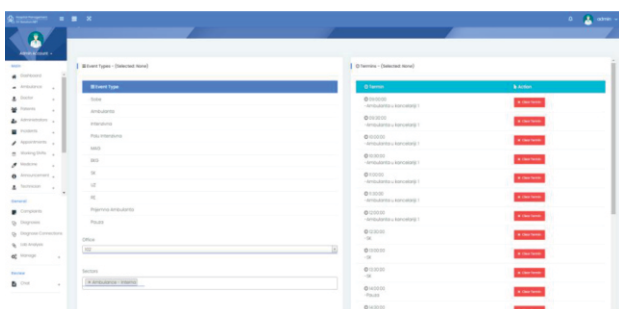

### We currently offer the following features

#### Real-time Tracking

NIMS® is medical software that transforms the way clinics and hospitals manage their inventory, staff, and patient care. With our solution, you'll gain complete remote and real-time insight into your stock, ensuring critical supplies never run out. The system can automatically reorder items when stock runs low and even select the most competitive prices to reduce costs.

Our software also tracks and reports every action of your medical staff, providing a comprehensive view of patient care, reducing errors, and fostering trust among patients and their families. Staff can easily access information about previous treatments, current patient parameters, and doctor recommendations. Our system sends timely reminders and instructions for treatments, streamlining the entire process.

In the control center, staff locations and activities are monitored in real time, enhancing productivity and coordination. As a result, our software ensures accurate and infallible therapy and care, increasing patient trust and satisfaction.
